Rubber rigid corner guard

Profile type: G5

- Description: Rubber rigid corner guard protects walls against damage.

- Application: edge protection

- Length of the profile: 80 cm

- Width of the profile: 10 cm

- Height of the profile: 8 cm

- Alloy of the profile: rubber rigid

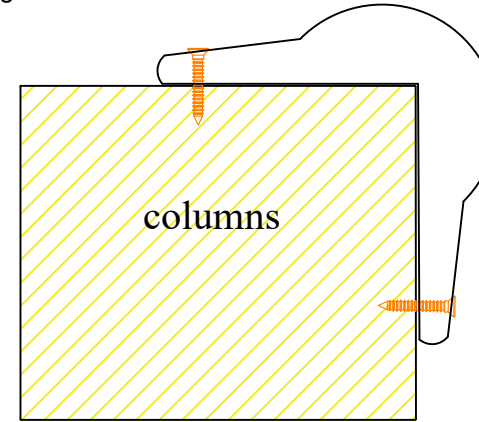

- Anodized colours: Black

- Additional colours:

- Fixation: screwing, countersunk drilled holes 3,5 mm and self-adhesive and with a surface glue. Wide range of colours, also with warning stripes.

Introduction Of Corner Guard:

Corner guards are constructed from high impact resistance natural rubber. They are designed to protect the edges of columns in structures. Corner guards relieve the tension of chipped & broken corners of pillars / columns. They are mounted onto the edges of, preferably all the 4 edges of square columns of basement parking as well as the edges of the walls in industrial premises. They are suitable for medium & heavy traffic areas & also moving trolleys. They are a perfect solution for chipped edges in car parks, hospitals, nursing homes, laboratories, hotel, schools, sports areas and multitude of other commercial properties.
