RUBBER CORNER GUARD

Product Description

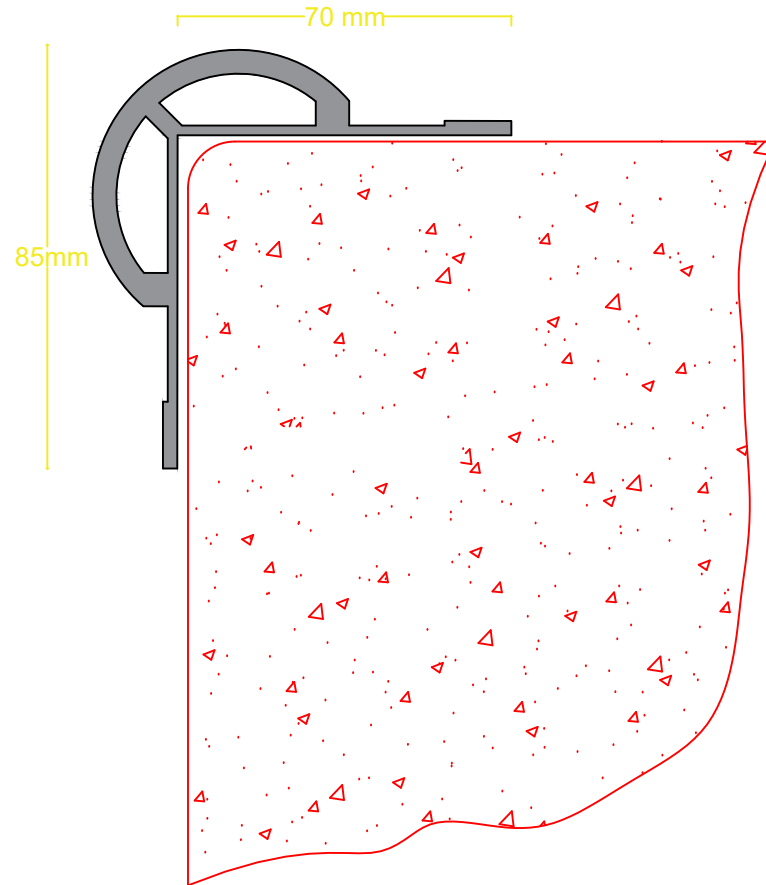

Corner Guards

Profile type: G2

Name : Corner Guard
Length : 100cm
Thickness : 15 mm
Width : 85 mm / 85 mm
Other size also can produce

Introduction Of Corner Guard:

Corner guards are constructed from high impact resistance natural rubber. They are designed to protect the edges of columns in structures. Corner guards relieves the tension of chipped & broken corners of pillars / columns. They are mounted onto the edges of, preferably all the 4 edges of square columns of basement parking as well as the edges of the walls in industrial premises. They are suitable for medium & heavy traffic areas & also moving trolleys. They are a perfect solution for chipped edges in car parks, hospitals, nursing homes, laboratories, hotel, schools, sports areas and multitude of other commercial properties.
